

Press Release

Arkus AI partners with industry leader Medcover Genetics to innovate AI in Genetic Diagnostics

2020 11 05, Arkus AI AB, Stockholm

Arkus AI are excited to announce our latest partnership with Medcover Genetics GmbH to innovate and apply AI (Artificial Intelligence) in the field of genetic diagnostics. Medcover Genetics GmbH is part of Medcover Group, a forward-looking international leader in the healthcare and diagnostic service industries.

Armed with Medcover's world-leading clinical genetics expertise and deep understanding of real-life problems, together with the Arkus team of exceptional AI talents, we are on track to successfully apply AI to Genetic Diagnostics to improve global health care for all.

We are thrilled to welcome the highly respected expert in clinical genetics, Dr Markus Stumm from Medcover, as our project advisor.

For more information, please contact: Chairman/Co-founder, Ying Cheng, ying@arkus.ai, +46 (0) 760901386

Arkus AI AB is an AI startup created in January 2020, as a spin-off from InnoFusion Technology and Design AB. As a result of a project co-founded by a Vinnova innovation grant for SME in 2019, Arkus AI was created to innovate Artificial Intelligence technologies in the field of genetic diagnostics and healthcare. Its vision is to deliver AI worldwide in the spirit of continuous innovation and earnest compassion. For more information, go to www.arkus.ai

About Medcover:

Medcover is a leading international healthcare and diagnostic services company and was founded in 1995. Medcover operates a large number of ambulatory clinics, hospitals, specialty-care facilities, laboratories and blood-drawing points and the largest markets are Poland and Germany.
